

CHAPTER FOUR

IMPLEMENTATION, RESULTS AND DISCUSSION

A brief overview of the chapter.

- State that the chapter presents the system implementation, results obtained, and discussion.
- Link to the objectives of the study.

4.1 System Implementation

Describe how the system was built and operates.

Include:

- Technologies/tools used (e.g., programming language, frameworks, hardware for IoT)
- Platform (web, mobile, embedded system)
- Brief explanation of system workflow or operation

Do not repeat design details from Chapter 3.

4.2 Results Presentation

Present outputs generated from the system.

Include:

- Screenshots of system interfaces (clearly labeled as figures)
- Tables showing outputs or data
- Charts/graphs (if applicable)
- Sensor readings or device outputs (for IoT projects)

Only present results here. no explanation yet.

4.3 System Testing and Validation

Show how the system was tested and whether it works correctly.

Include:

- Test cases (in table format)
- Inputs, expected outputs, actual outputs
- Status (Pass/Fail)

4.4 Discussion of Results

Explain and interpret the results presented earlier.
Include:

- Whether the system met expectations
- Explanation of results and observations
- Any issues or unexpected outcomes
- Link results to project objectives

4.5 Performance Evaluation

Evaluate how well the system performs.
Include:

- Speed/response time
- Accuracy
- Reliability
- User experience

4.6 Summary

Summarize key points from the chapter.

- Highlight major findings
- No new information

CHAPTER FIVE

SUMMARY, CONCLUSION AND RECOMMENDATIONS

5.1 Summary of the Study

Provide a concise overview of the entire project.
Include:

- Problem addressed
- Objectives
- Method used

- Key results

5.2 Conclusion

State what was achieved based on the results.
Include:

- Whether objectives were met
- Final outcome of the project

Must be based on findings from Chapter 4.

5.3 Contributions of the Study

Highlight what the project contributed.
Include:

- Development of the system
- Improvements over existing methods
- Any unique features or ideas

5.4 Limitations of the Study

State constraints encountered.
Include:

- Technical limitations
- Time constraints
- Data or hardware limitations

5.5 Recommendations

Suggest improvements and future work.
Include:

- Enhancements to the system
- Additional features
- Suggestions for further research

Quick Summary for Students

Chapter 4 →

Show your system + results + explain them

Chapter 5 →

Summarize everything + conclude + suggest improvements
